

[www.careerhorsens.dk](http://www.careerhorsens.dk)

Dear students

Its a pleasure for us to invite you all to Career Horsens 2011.

Career fairs are important to students, since they give you the chance to meet and interact with companies you would like to work for in a relaxed environment. Also, companies often bring open positions to career fairs - these could be student jobs, internships, traineeship or permanent employment.

In this book you can see, which companies you can meet at October 26.

You should prepare by studying the websites of the companies and prepare good questions.

Som en del af Atea koncernen er vi repræsenteret i hele Norden og Baltikum. Ateas primære forretningsområder: Salg af hardware, software og supplies, **It-integration, It-Service og Outsourcing, It-kommunikation, uddannelse**

## ORGANIZERS AT CAREERHORSENS 2011

The Municipality of Horsens has a population of almost 80,000 people since the local government reform January 1 2007 and the joining of the municipalities of Brædstrup, Gedved and Horsens. The Municipality of Horsens is governed by mayor Jan Trøjborg and a municipal council of 31 elected politicians.

Horsens Business, Innovation & Tourism Centre is a local non-profit entity responsible for boosting business and tourism development. The aim is to secure the Horsens region as a prime location for doing business and as an attractive place for tourists to visit.

VIA University College, Career Service Center is for students and companies who need to make contact with each other. Career Service Centre guides students in relation to career opportunities, and is hosting events for students to get them closer to the companies so they get a good start in their career. We also assist companies to recruit students in relation to student jobs, trainee positions and permanent employment after graduation.

Artlinco is a company specializing in strategic design. We assist our customers with holistic innovation and product development and we can contribute to the entire process from concept to market introduction - or to individual parts of the process, as requested. An important common denominator for our over 185 successful projects is that we work in multidisciplinary teams which create scenarios and solutions based on a perfect mixture of customer insight, analyses, data, creativity, technical expertise and experience.

Our team includes

Across the team we work on communication and marketing and we ensure that your new products make progress and become successes. When faced with requirements which cannot be managed in-house at Artlinco, we draw on our extensive and competent network which covers practically every field. In the final analysis, Artlinco is your guarantee of the right team for the right project and of turning your strategic product development into a success.

High quality consultancy services. Our objective is to deliver the highest quality measured by international standards. We achieve this through our employees' skills and knowledge. COWI therefore wishes to attract the most talented people - both newly qualified and experienced. Everyday working across subjects:

We provide solutions in an inspiring multidisciplinary environment. This requires working together with colleagues who possess different specialist knowledge. And here the possibilities are optimal in a workplace where engineers work side by side with traffic and urban planners, economists and biologists.

Career: All employees begin their career based on their professionalism. You must be skilled in your own area and be able to use your knowledge with your colleagues expertise for the benefit of the customer. Young in COWI: Read more on our website about being young in COWI and get answers to your questions.

A world leading manufacturer  
Kamstrup is a high-technology company and a world leading manufacturer of system solutions for energy metering. Our head office and production site are placed in Stilling near the city of Skanderborg. We are represented in 50 countries and enjoy a strong international position.

Valuable employees  
We credit our success to our employees and we treat every employee individually. Responsibility, empowerment and decentralisation are important elements in our employee policy focusing on each individual employee. Constant growth caused by an increasing global demand for energy metering solutions means a growing need for even more innovative developers at Kamstrup.

Vil du arbejde hos en verdensførende virksomhed?  
Kamstrup er en af verdens førende producenter af avancerede løsninger til energimåling og fjernaflæsning og kan blandt andet prale af at være verdens største producent af ultralydsvarmemålere.

Vi giver dig frihed  
Vi vil fortsætte med at være førende inden for vores branche, og det kræver, at vi har den nyeste viden. Den får vi blandt andet fra studerende og nyuddannede. Derfor vil vi også gerne bidrage til at styrke uddannelserne gennem praktikophold og projektsamarbejde, særligt inden for områderne elektronik, embedded software, højniveau-software og mekanikudvikling.

Independence, Responsibility, Dedication, and Entusiasm are keywords for us - If you have got that, everythings is possible. We realise that we are merely a small part of a global world. Denmark is where we live, think, and design, but we develop our software in South America, our products are and will be used globally , and the world outside Denmark is more important than the world inside Denmark. We are small, but it depends on how you count us. Only 5 people in DK + a software department in South America, but we have cooperation partners, markets, and possibilities globally. Help us share those possibilities and experience the value of a dedicated team with a unique product and concept and a large potential.

Pressalit was established in 1954. Today, Pressalit A/S is one of the leading European manufacturers of toilet seats and specialized bathroom solutions for people with disabilities. The group includes two business areas: Pressalit Seats and Pressalit Care. They both pursue individual objectives and do business with individual segments, but share a living, fertile culture, based upon a common set of values: We listen - because at Pressalit we respect other people and their views.

We enjoy recognition for our efforts - we believe in finding strength through being different. We give. And receive in return. We share knowledge and experience. We believe in committed people. We believe in the interaction between the employee and the organization. In a partnership that is always prepared to challenge the status quo. We play - because without play, there can be no development.

Initially, all big ideas seem absurd, as Einstein said. That is why we give room to oddball thinking. We dare to take chances. We are bold. Also when it comes to life. We appreciate humor. And we have a zest for life. We act in a focused way. We are born innovators. We enjoy trying new things. By creating value for our customers - and our customers' customers. Through our actions, we are constantly renewing our credibility. We are focused. We recognize that we are assessed by our results (and not by the processes). We are always prepared to do better where there is room for improvement.

# SYSTEMATIC

Be part of making software for people who are making vital decisions every day.

Want to be part of a software company that puts customer needs first and focuses on solutions that provide customer value? Would you like to develop your knowledge and skills, you appreciate the variety of tasks, and prosper you enjoy working in professional teams? Then your future workplace might be Systematic.

#### About Us

Systematic is Denmark's largest privately held software and systems. We have approximately 450 employees, offices in four countries and customers in more than 40 countries. Most of our clients find themselves in the defense, health, police, the financial sector and government institutions. We are a modern IT supplier with employees and world-class technology. Through cooperation based on trust and mutual respect we provide systems, products and services to user systems. We specialize in information and communication systems, where there are high demands on operational stability, security, freedom from error and usability. Many of employees in the armed forces, hospitals and in industrial and service companies are using our software daily. Get close to customers worldwide, we pride ourselves in understanding the client's business and focus on the solution developed in close collaboration with the customer.

You are part of working with your natural curiosity, which mixed with your professionalism makes you a professional sparring partner for our customers, partners and colleagues. We are the world's highest professional level of maturity - CMMI Level 5. This means that we have proven processes that make everyday life simpler, so there is a surplus of innovation.

#### Where are we going?

Systematic is a rapidly evolving from primarily been project house now to be established as produktus. This means that we are both doing projects from a to z, while maintaining a strong focus on complementary business with a portfolio of "shelf", ie. turnkey solutions that customers with few modifications to take into use immediately. We have a strong product portfolio in both Defense and Health Care area. This means that we should not just be able to satisfy customers' needs but also proactively predict them. Internally, it requires innovation and market intelligence to product rather than take the solutions that customers demand in 4-5 years. Besides, we have good growth rates in our overall project business. The main reason that customers recognize our high quality, our collaborative methods and our delivery deadlines. Nurturing talent and skills The best employees are our lifeblood. The ability to deliver quality software on time depends primarily on the skills and personal commitment. It is therefore important for us to attract, retain and develop employees. It requires that we can offer an exciting and challenging workplace where we are actively investing in professional and personal development. We take staff development very seriously in Systematic. This means that we annually conduct a staff development interview where employee and line manager will have a good dialogue about the success criteria of each staff member for the coming period. To be able to reach the agreed success criteria, established a personal development plan that includes both professional and personal development. For each area is also identified specific development issues. Through the years follow-up on how it goes with the employee's development. A dynamic workplace with space for the whole person, we are a workplace where there is control of workflows and short way to the decisions - and thus action. As an employee with us there is opportunity to influence the tasks and decisions. We are also a company with room for the whole person. We have expectations for you to deliver a solid effort, but it must be balanced with leisure and family.

24

# TAGARNO

seeing solutions

TAGARNO is an international family owned company. The company was founded in 1971 and we are 25 employees in Horsens. TAGARNO develops and manufactures high quality magnification systems for our 4 markets, LOW VISION, EDUCATION, INSPECTION and MEDICAL. TAGARNO exports worldwide through distributors in more than 40 countries.

Our values include innovation, learning, design and cooperation with colleagues and our partners and customers. We work in a very creative business culture enabling us to create intelligent and innovative camera solutions using the latest technology. We work in project groups across the organization and our cooperation at TAGARNO is built on team work, trust, hard work and respect for each other.
